# GILLING COURT

## Project Management

Gilling Court is a large 'H' Shaped four storey in North West London. Thomas & Thomas were engaged to undertake an external major works programme to attend to widespread and prolonged deterioration of the building's fabric, paying particular attention to the concrete cills which have suffered several carbonation and subsequent failure.

## Project Highlights

The works were completed on time and within budget, with the extensive repairs undertaken to the concrete cills and brickwork facade bringing the building façade back to life.
